The Nicene-Constantinopolitan Creed contains a basic and vital summary of the fundamentals of our Orthodox Christian faith. In the early Church it was even considered to be a standard of the faith, drawing a line of demarcation between true belief ['orthodoxy'] and false teachings ['heterodoxy']. For many today, however, it has simply become another text which is recited but not fully understood?

You are warmly invited to attend the seminar *Introducing the Creed* which will offer some insights into this crucial text of our Orthodox Church. You'll have the opportunity to explore:

- how the Creed came about;
- some of the Church Fathers who were instrumental in its preparation;
- the ways in which the text is related to Holy Scripture; and
- some of the eternal truths proclaimed by the Creed which are not only necessary for our salvation but also for living life today.

Program
